

Thank You God

For Giving Me

PERIODS

*Preserve Your Menstrual
Blood Stem Cells And
Stay Protected For Life*

Hey Lady, Here Is More Power To You!

That time of the month is something that you hardly look forward to. But did you know that your periods have the power to keep you healthy throughout your life?

Your menstrual blood is a rich source of stem cells that have the potential to treat many medical conditions.

What Are Stem Cells?

Stem cells are the very foundation of the human body. Every part of our body including blood, bones, skin and muscles are formed from master cells known as stem cells.

These stem cells have three important qualities:

1. Have the capacity to turn into any type of cell in the body such as muscle cell, bone cell, blood cell, tissues and brain cell¹
2. Can replicate or copy themselves limitlessly²
3. Are responsible for repair and regeneration functions in the body³

Owing to these qualities, stem cells are taking center stage in medicine today. Research has proven that stem cells can be used in the treatment of many medical conditions. In the past 50 years, over a million people⁴ have benefitted from the power of stem cells and are now living a renewed life.

Menstrual Blood: A Rich Source Of Stem Cells

The menstrual blood is always disposed as unsanitary body waste. Research has discovered that menstrual blood is rich in regenerative stem cells known as mesenchymal stem cells that have the potential to develop into many other types of cells that make up the heart muscle, bone, cartilage, tissue, nerve and adipose tissue.⁵

Medical research is indicating that these stem cells from the menstrual blood have the potential to be applied in the treatment of lifestyle conditions or regenerative medicine. Some of the conditions that are currently under research and clinical trials using mesenchymal stem cells include:⁶

- Alzheimer's Disease
- Aplastic Anaemia
- Ataxia
- Autism
- Cardiomyopathy
- Cerebral Palsy
- Diabetes Type 1
- Liver Cirrhosis
- Lupus
- Multiple Sclerosis
- Rheumatoid Arthritis
- Spinal Cord Injury
- Traumatic Brain Injury

Menstrual Blood Stem Cell Banking

LifeCell brings you a revolutionary service that provides you the opportunity to collect and preserve your menstrual blood.

Now, through menstrual blood stem cell banking you can collect and preserve your precious stem cells that have the potential to be used in future medical treatments.

What better way to protect yourself!

The best time to have your menstrual blood stem cells preserved is now! The younger you are, the healthier your menstrual blood stem cells are. With this valuable resource, you have access to potential healthcare and wellness therapies in the future.

Take charge today and start preparing for a healthy future.

Getting The Power Of Stem Cells: 5 Steps To Menstrual Blood Stem Cell Banking

Why LifeCell?

First & Largest: Established in the year 2004, LifeCell is India's first and largest stem cell bank. LifeCell was established in technological collaboration with Cryo-Cell International, USA - the world's first private stem cell bank.

Most Accredited: Right from sample testing, processing, preservation & reporting, to management of sensitive client data records, LifeCell deploys international quality standards in its operations. Our international accreditations are a proof to this commitment.

State-Of-The-Art Infrastructure: LifeCell is the only stem cell bank with dual storage sites at Chennai & Gurgaon, each with over 65,000 sq.ft. of operating area and advanced equipments. A highly secure zone, our processing centers ensure that the stem cell samples are given utmost care and are kept well-protected.

With LifeCell Femme, you get the unique opportunity to collect and preserve menstrual blood stem cells that have the potential to treat many medical conditions.

Menstrual Blood Stem Cell Banking

	Single Site	Dual Site
STANDARD STORAGE PLAN		
Standard Storage	9,990	9,990
Dual Storage Set-up Fee	-	2,000
Total First Year Fee	9,990	11,990
Annual Storage Fee	1,200	1,500

Protect Baby. Protect Mom.

Pregnant? Protect your baby and protect yourself too. Sign up for the combo package of LifeCell's **Protect Baby Protect Mom** – umbilical cord stem cell banking + menstrual blood stem cell banking.

	Single Site	Dual Site
Standard Storage	19,980	19,980
Dual Storage Set-up Fee	-	4,000
Total First Year Fee	19,980	23,980
Annual Storage Fee	4,700	5,500

All Currencies In Indian Rupees (₹)
